This course (6 hour continuing education) is designed to familiarize Contractors and Inspectors with information on the updated construction codes required for building a home, according to the Uniform Dwelling Code (UDC). SPS 322 and the commentary are used as reference materials.

Topics covered in this course include Scope, Application, Definitions, Insulation Materials and Installation, Dwelling Thermal Envelope, Systems and Simulated Performance Alternative are included in this course.

Course 14239 - MOLD PREVENTION & REMEDIATION

Molds are the most common forms of fungi found on earth. They can grow on almost any material, as long as moisture and oxygen are available. Most molds reproduce through the formation of spores, tiny microscopic cells that are resistant to drying and are released into the air. Individuals involved in the construction trades come into contact with mold during a renovation or maintenance of building.

This course is intended to give employers and employees a fundamental knowledge of mold prevention and remediation solutions when working on a construction project.
